

Air Navigation Services of the Czech Republic

To whom it may concern

Jeneč, September 1, 2022

We hereby confirm, that “**FDPS ESUP-NS**”, backup flight data processing system developed and delivered by CS SOFT a.s. (www.cs-soft.cz) was put in live operation in February 2022 and serves us in its full capability since then.

The ESUP-NS system is being used as backup FDPS for TopSky system from Thales and in cooperation with main TopSky system provides as well set of functions supporting operations at Prague International Airport - CDM. It also contains special technology for routing OLDI communication with neighbors and for routing coordination with military. As a result of its full integration with surveillance backup, ANS CR has capability to switch to backup mode to provide air navigation services in case of planned maintenance or failure of the main system. Along with operational system, simulator version for training purposes has been deployed as well.

ESUP-NS provides flight data processing functionalities which include, but are not limited to:

Coordination with main system, backup for main system, online backup, backup for LKPR TWR, CDM, OLDI proxy, MIL proxy, statistical outputs.

We recommend CS SOFT as a reliable and trustworthy software supplier and long-term partner.

Yours sincerely,

Mr. Vladimír Čížek
